

Product Information Bulletin

CI-800 Pipeline Corrosion Inhibitor

DESCRIPTION:

CI-800 is a filming amine type corrosion inhibitor that has been designed for down hole batch treating. While the amine molecule has been modified to improve water solubility in fresh waters, **CI-800** Corrosion Inhibitor will form very stable dispersions in most oilfield brines. **CI-800** will lay down an impervious protective film on down hole tubulars, thereby inhibiting the corrosive attack by the produced fluids.

CI-800 is also formulated to treat Gas Pipelines and will effectively control the corrosion attack on metal surfaces as well as treat areas where produced fluids may accumulate in low spots.

PHYSICAL PROPERTIES:

Density (Lbs./Gal)	8.693
Specific Gravity @ 60°F	1.0436
Flash Point	>212°F
Pour Point	0°F
pH	8.0 – 9.0
Solubility	
Isopropanol	Soluble
Methanol	Soluble
Water	Soluble
Heavy Aromatic Solvent	Dispersible

HANDLING PRECAUTIONS:

For information regarding safety precautions in handling, health hazards, and exposure, please refer to the material safety data sheet for this product. In case of emergency, please call (361) 527-4460.
